FORGING CHARACTER & CREATIVITY IN YOUTH.

# WHY SEND YOUR KID TO X-CAMP?

## Character Lab

We use team activities and games, goal setting and journaling in the identity/ identification discovery process to forge character.

## Creativity Lab

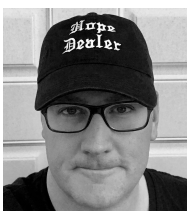

We experiment and explore by navigating an adventure, problem solving, and overcoming mental & physical challenges.

## Cultural Diversity

We hope to serve our city and the people of our community by offering a camp that includes everyone.

## Community Partnership

We serve the city and we look for local support. Our partners are doing exciting things and we want to feature their work too.

Rob

Keith & Tina

Veirdre

## Our Mission & Vision

Our Mission is to forge **character** & **creativity** in teens so that their lives will be marked by hope.

Our Vision is to see teens harness the power of hope to create meaningful **futures** filled with infinite opportunities.

We offer an incredible, unforgettable, and **transformational** experience for teens in our community. Whether your teen is primed for leadership or struggling to keep up, we see the **potential** in all. Our small sized group approach offers a dynamic where anyone can thrive.

There are only 10 open spots for each camp. We believe teens need a more relationally **connected** experience where they can explore, discover, reflect, and share what they are learning. That happens best in smaller groups. Our hope is that teens will make life-long **friends** at X-CAMP.

## Sponsorships

The question I ask is what does it take to change a life- to see someone's life truly transformed? If you're like me, when you see a teen with a game controller or with a cell phone in their hand, you're underwhelmed. I see so much joy when they smile, when they create, and when they get their hands in the dirt! They are curious and lively. But they need opportunities to explore, experiment, fail, and triumph. We are asking for sponsors to **give generously**, to make this camp renown for transforming lives. Sponsor a youth today.
